

NANO SILVER

THE WORLD YOU CANNOT SEE

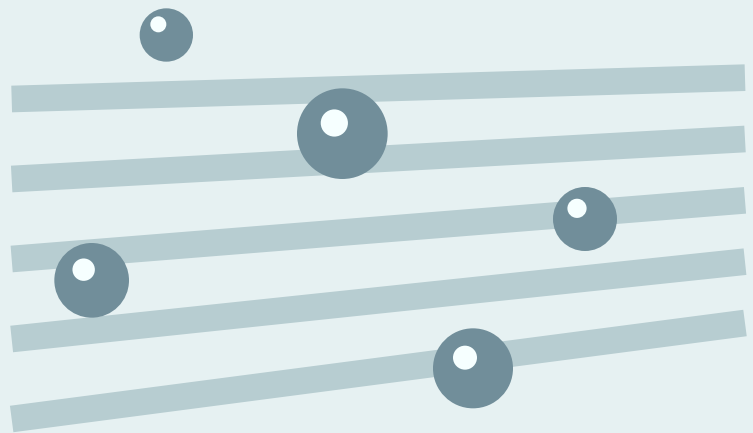

Conceptual illustration

SCIENCE / HOME / EVERYDAY LIFE

An invisible scale. Discover silver, fibres and a new approach to everyday cleaning.

What is nanosilver?

1–100 nm

nanoparticles in a material

Concept diagram, not to scale

[SOURCE >](#)

NANOPARTICLES / SILVER / FIBRES

Tiny silver particles. In Raypath cloths, they give the fibres properties that inhibit bacterial growth.

What changes in your day?

Long setup

An easier start

Too many bottles

Clean with water*

More disposable wipes

Use the cloth again

Bacteria in the fabric

Inhibits their growth

* For uses covered by the instructions.

TIME / FEWER DETERGENTS / SPENDING

Less setup and fewer bottles. Cloths you use again. These are benefits of the whole Raypath method.

Where does the dirt go?

1 / CLEAN

fibres + water

2 / FINISH

Sunbeam

3 / RINSE AND USE AGAIN

SOURCE >

FIBRES + WATER / SUNBEAM / RINSING

The wet cloth collects dirt. Sunbeam removes remaining water and dirt. Rinse the fabric and carry on.

Silver in the fibre. A specific role.

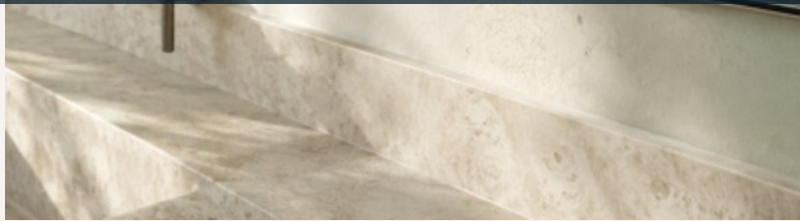

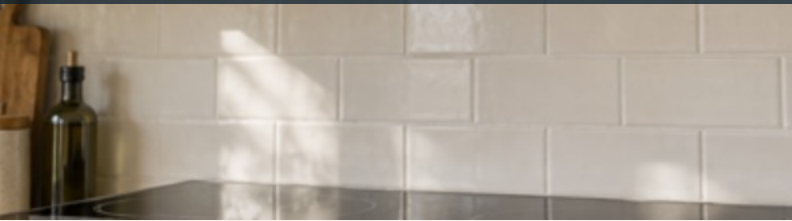

Inhibiting growth
in the cleaning fabric

[SOURCE >](#)

INHIBITING BACTERIAL GROWTH

The manufacturer describes bacteriostatic properties from nanosilver. The cloth still needs rinsing, washing and drying.

From glass to floors.

KITCHEN / BATHROOM / FABRICS

Choose the surface. Match the material,
amount of water and cleaning method.

RAYPATH

Technology in hand.

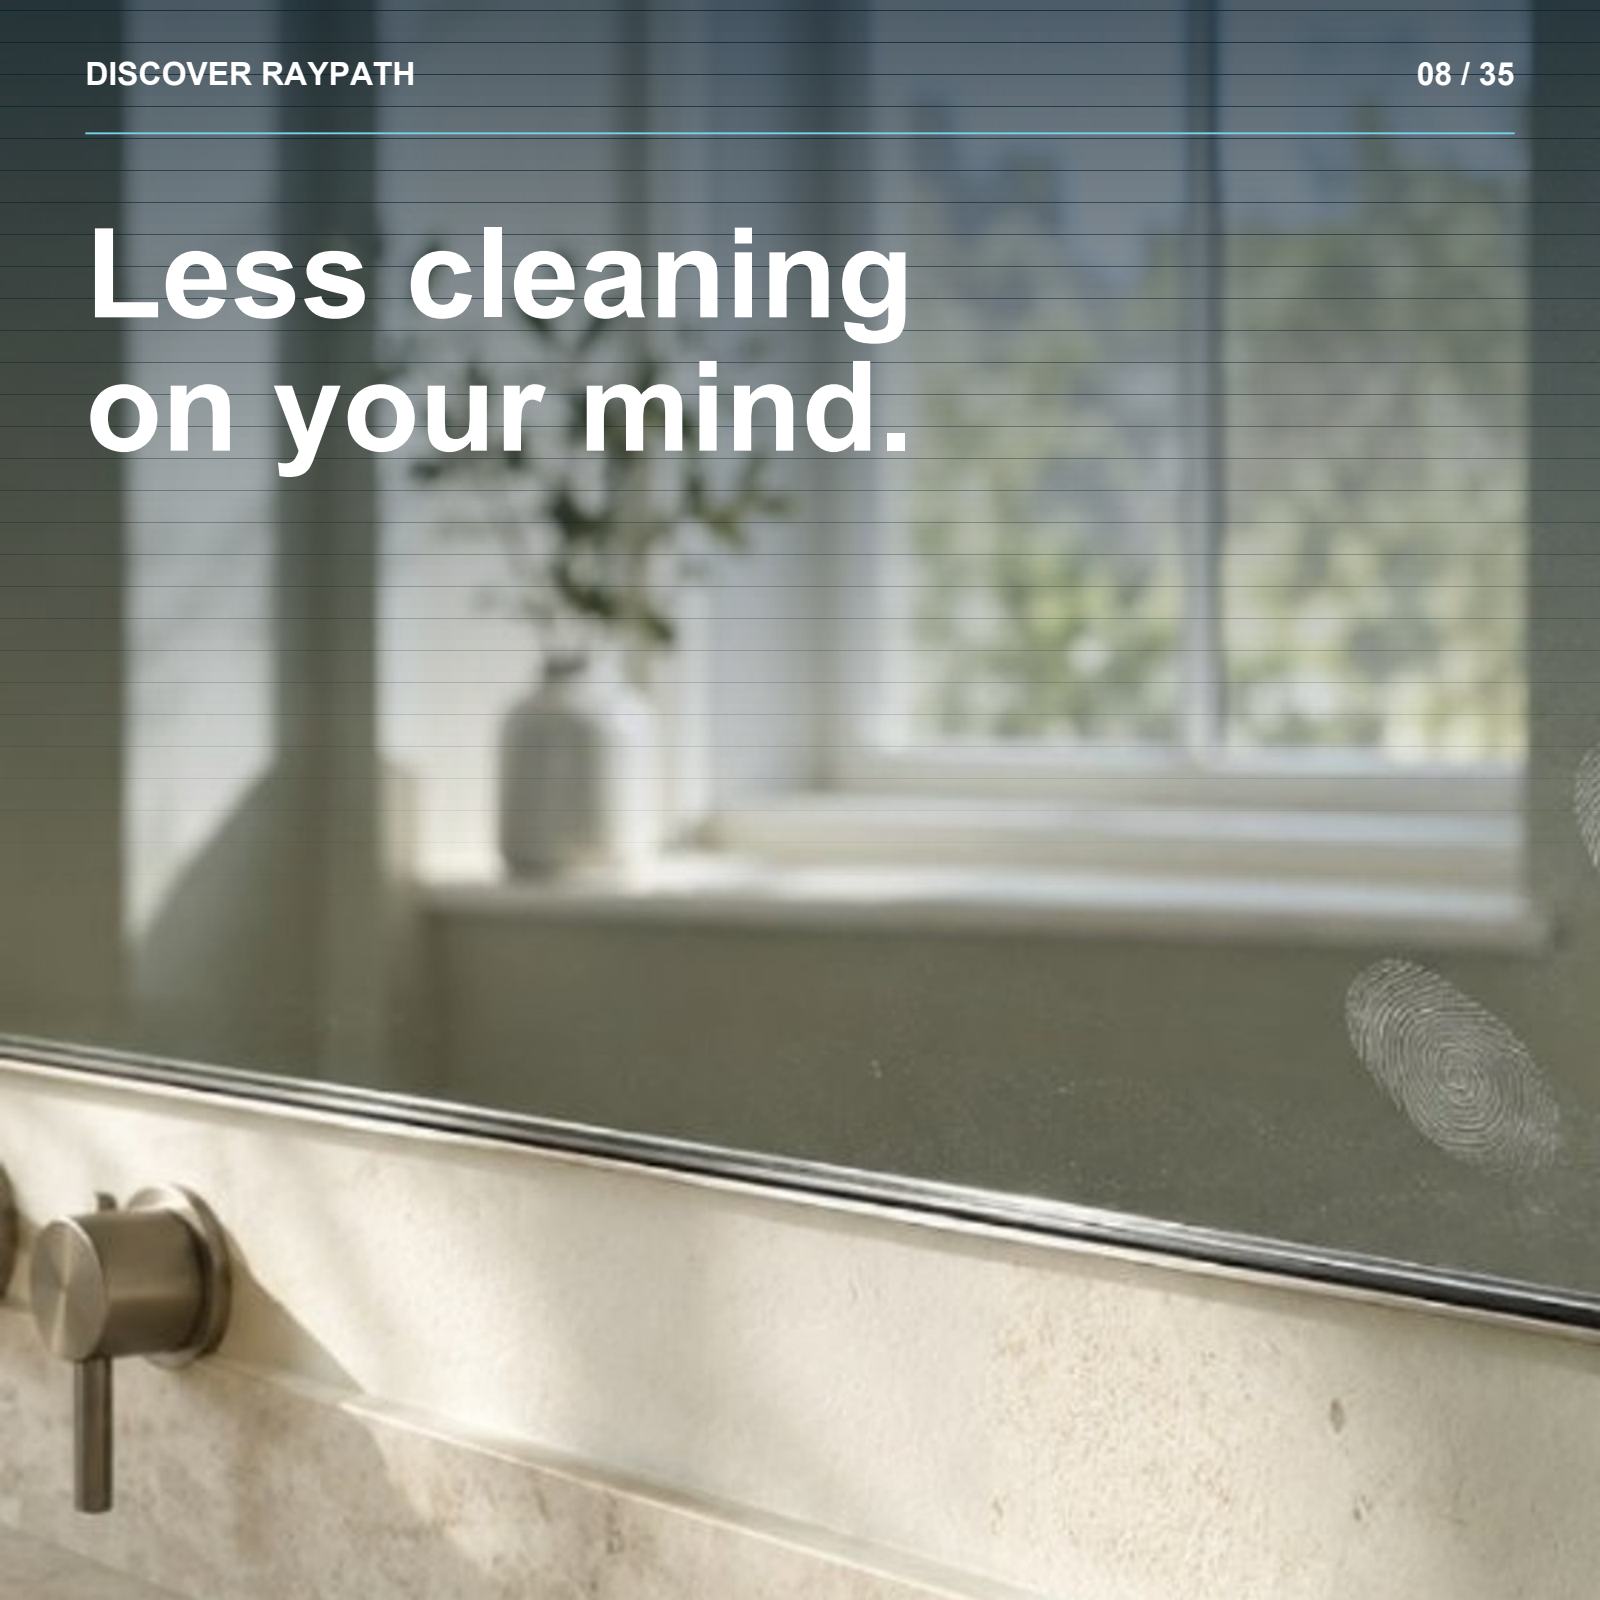

[SOURCE >](#)

MICROFIBRE / NANOSILVER / METHOD

The manufacturer describes nanosilver within the fibres. Cleaning relies on the right material and technique.

Less cleaning on your mind.

CHANGE THAT STARTS AT PLN 33

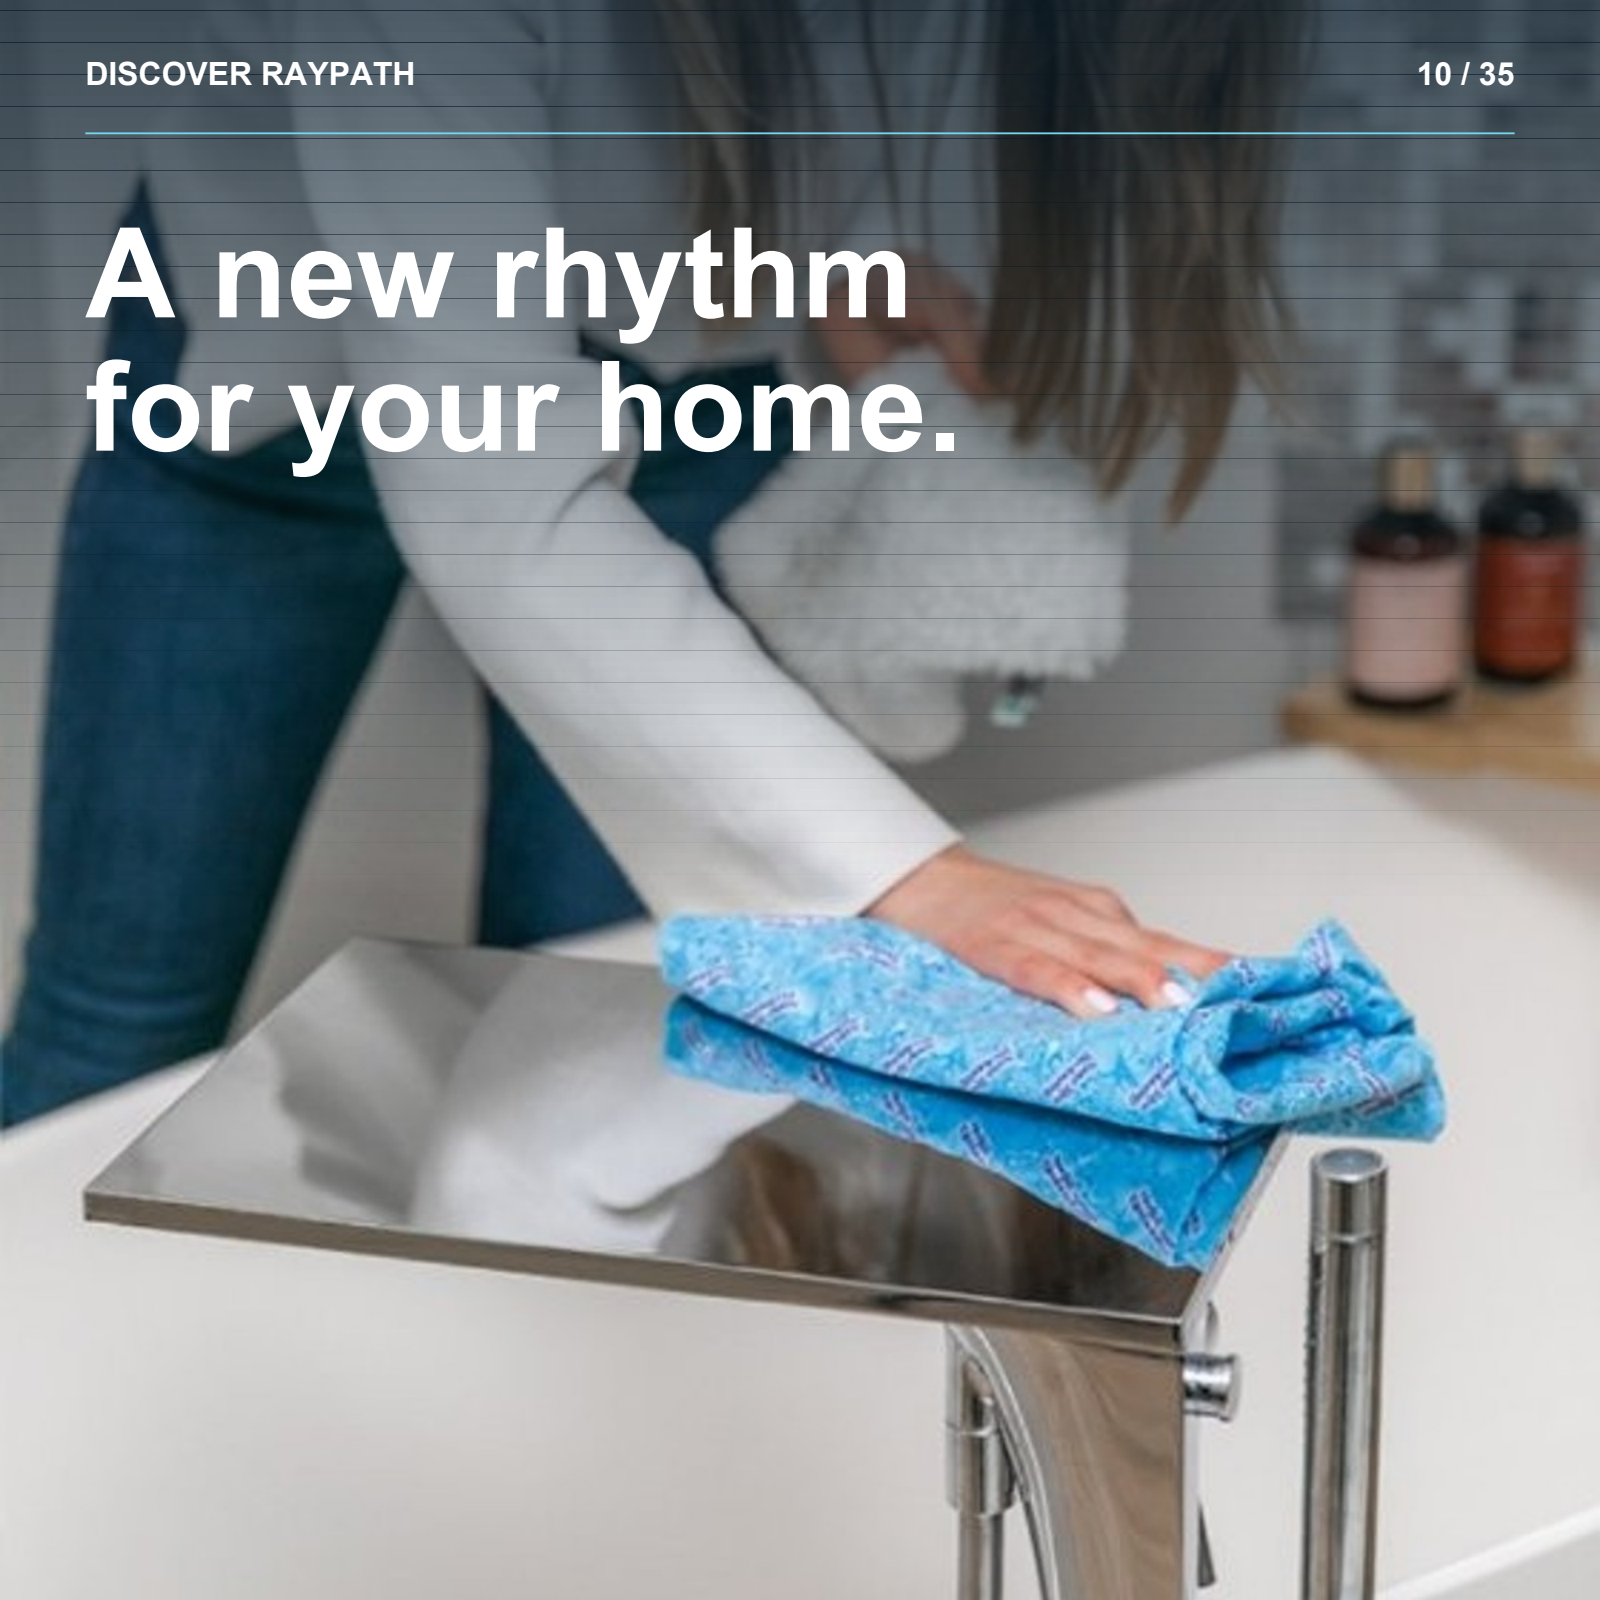

More life at home. Start with one task you would like off your mind.

Make room for your day.

TIME / FEWER DETERGENTS / REUSE

Less preparation. Water for suitable tasks.
Materials you can use again.

A new rhythm for your home.

ONE TASK / ONE GOOD START

Try the method on a small area. See the result. Make it part of your routine.

A Polish idea. Since 1993.

RAYPATH INTERNATIONAL

Products for everyday cleaning. Match them to the surface and the way you work.

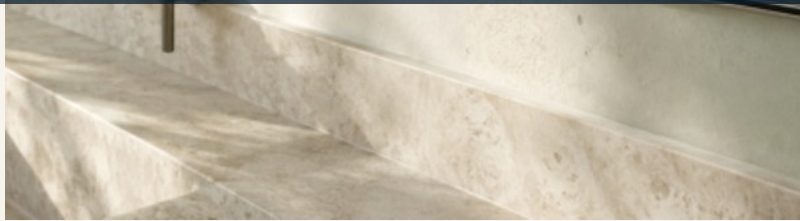

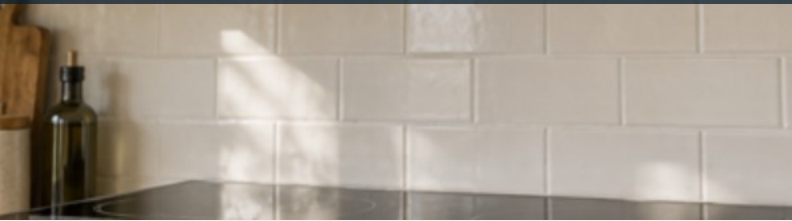

Fewer bottles. Simpler choices.

MATERIAL + WATER

For suitable tasks, clean without adding detergents. Check the product and surface instructions.

Before you start: three questions.

SURFACE / DIRT / WATER

What am I cleaning? What am I removing?
Can this surface tolerate water?

Colour points to the task.

WHITE / NOVA / PINK / SUNBEAM

Wet. Damp. Dry. Finishing. Check the role of your specific product.

A good start matters.

PREPARE / CHECK / TEST

Prepare the cloth as instructed. Test delicate surfaces in an inconspicuous spot first.

Less searching. More doing.

THE RIGHT PRODUCT / A SIMPLE ROUTINE

Knowing what to use makes it easier to start cleaning and get back to your day.

The kitchen after cooking.

WHITE GLOVE / WET CLEANING

Clean suitable water-resistant surfaces.
Rinse the material as you work.

Dust? One small task.

DRY / NO WATER TO PREPARE

Start with one shelf. The pink glove works without wetting.

Pink. Used dry.

COLLECT DUST / VACUUM THE FABRIC

Vacuum collected dust from the glove.
Follow the product instructions.

Glass in daylight.

FEWER MARKS / A BETTER VIEW

Sunbeam collects remaining water and helps finish glass. Judge the result with your own eyes.

Sunbeam. The final wipe.

COLLECT WATER / FINISH DRY

For light fingerprints, start dry. Heavier dirt needs cleaning first.

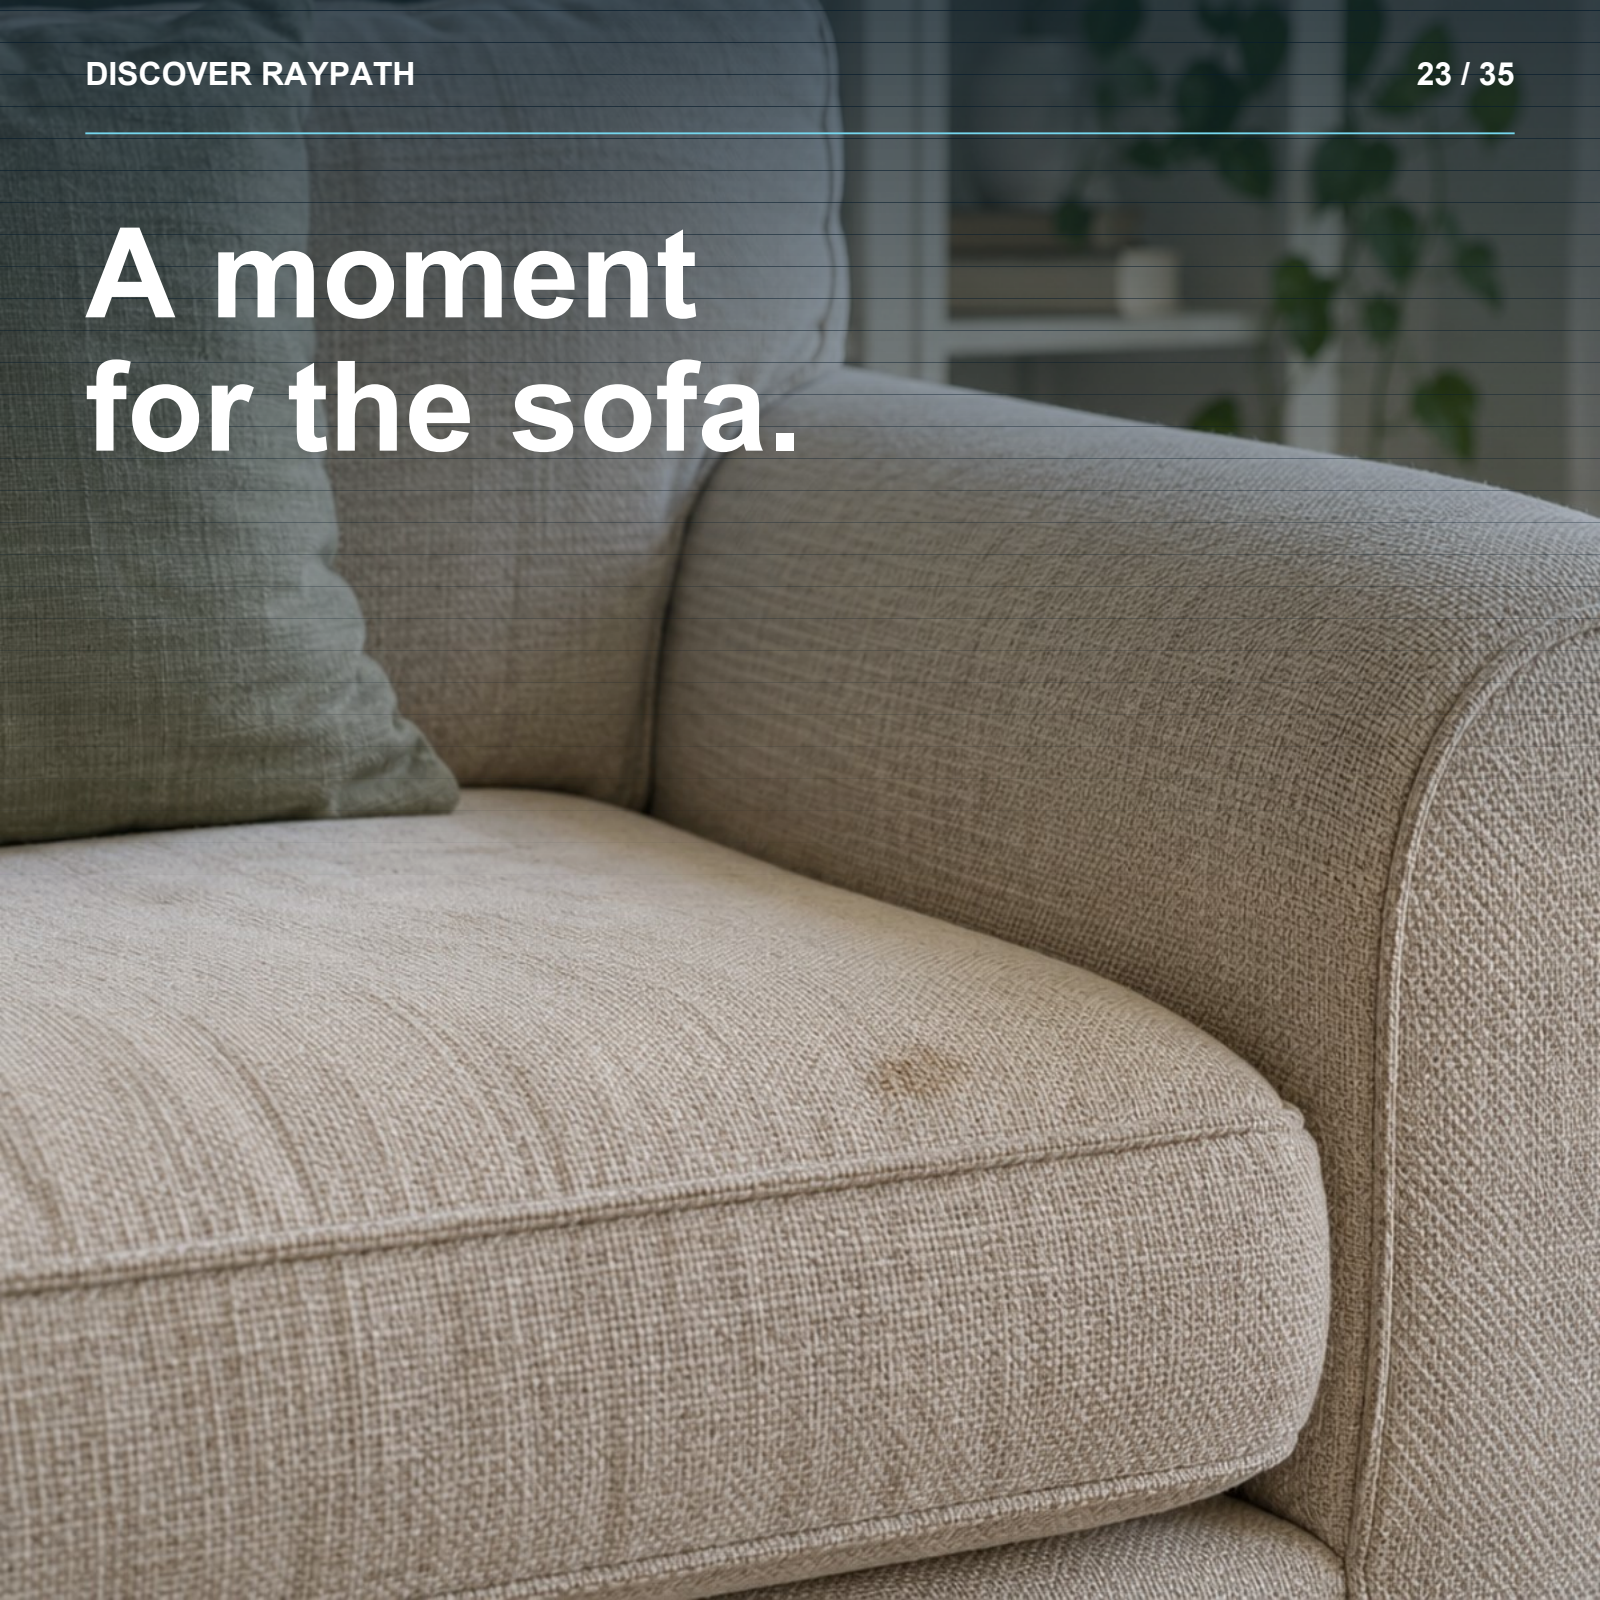

NOVA. Just enough moisture.

DAMPEN / WRING / CHECK

Control the amount of water. Choose the method to suit the surface material.

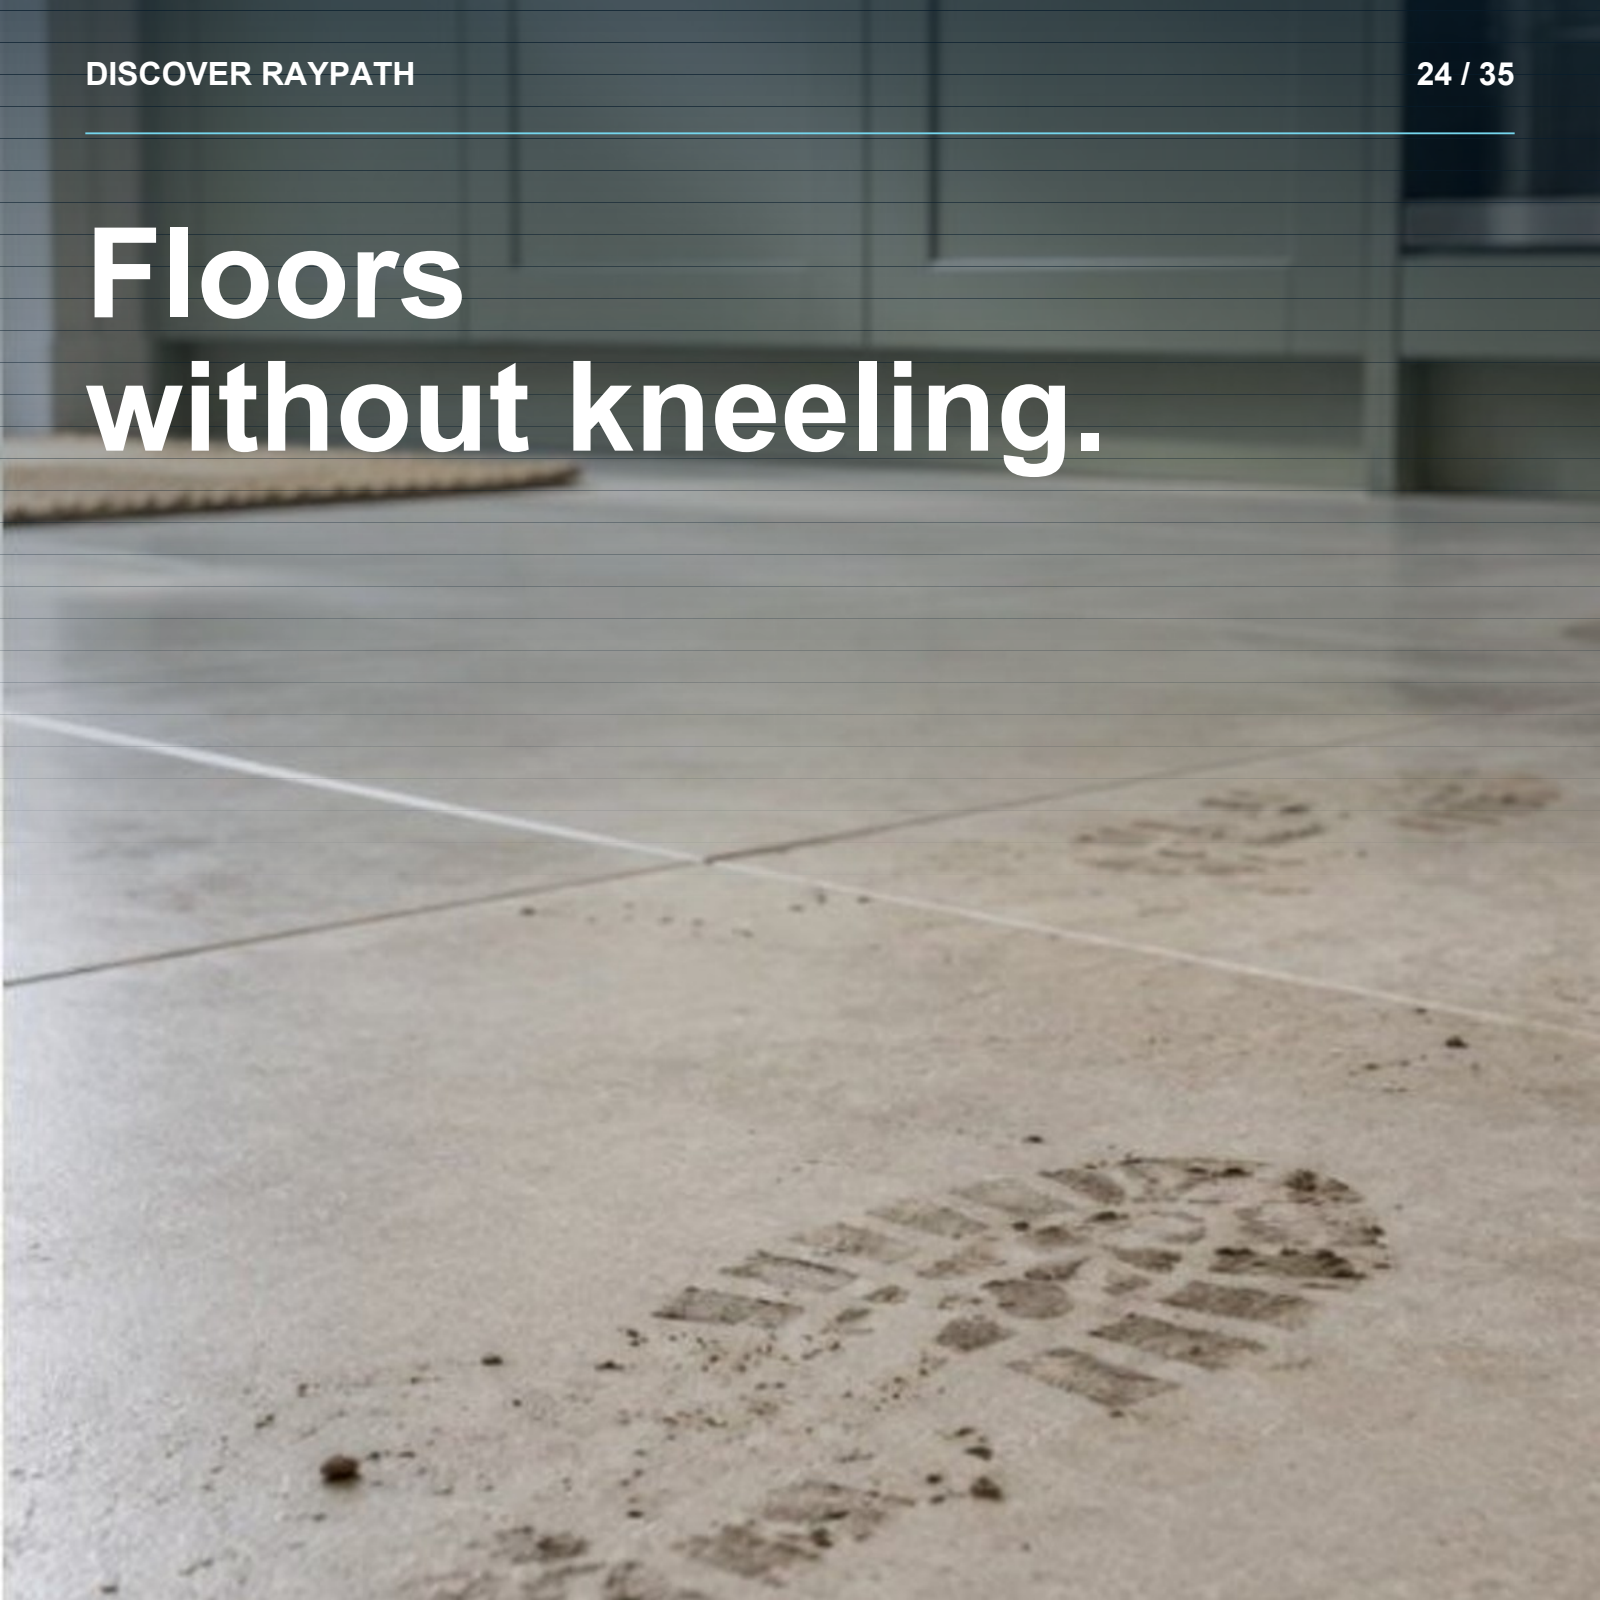

A moment for the sofa.

NOVA / SMALL AREAS / TEST FIRST

Only for water-tolerant fabrics. Check the manufacturer's guidance and test first.

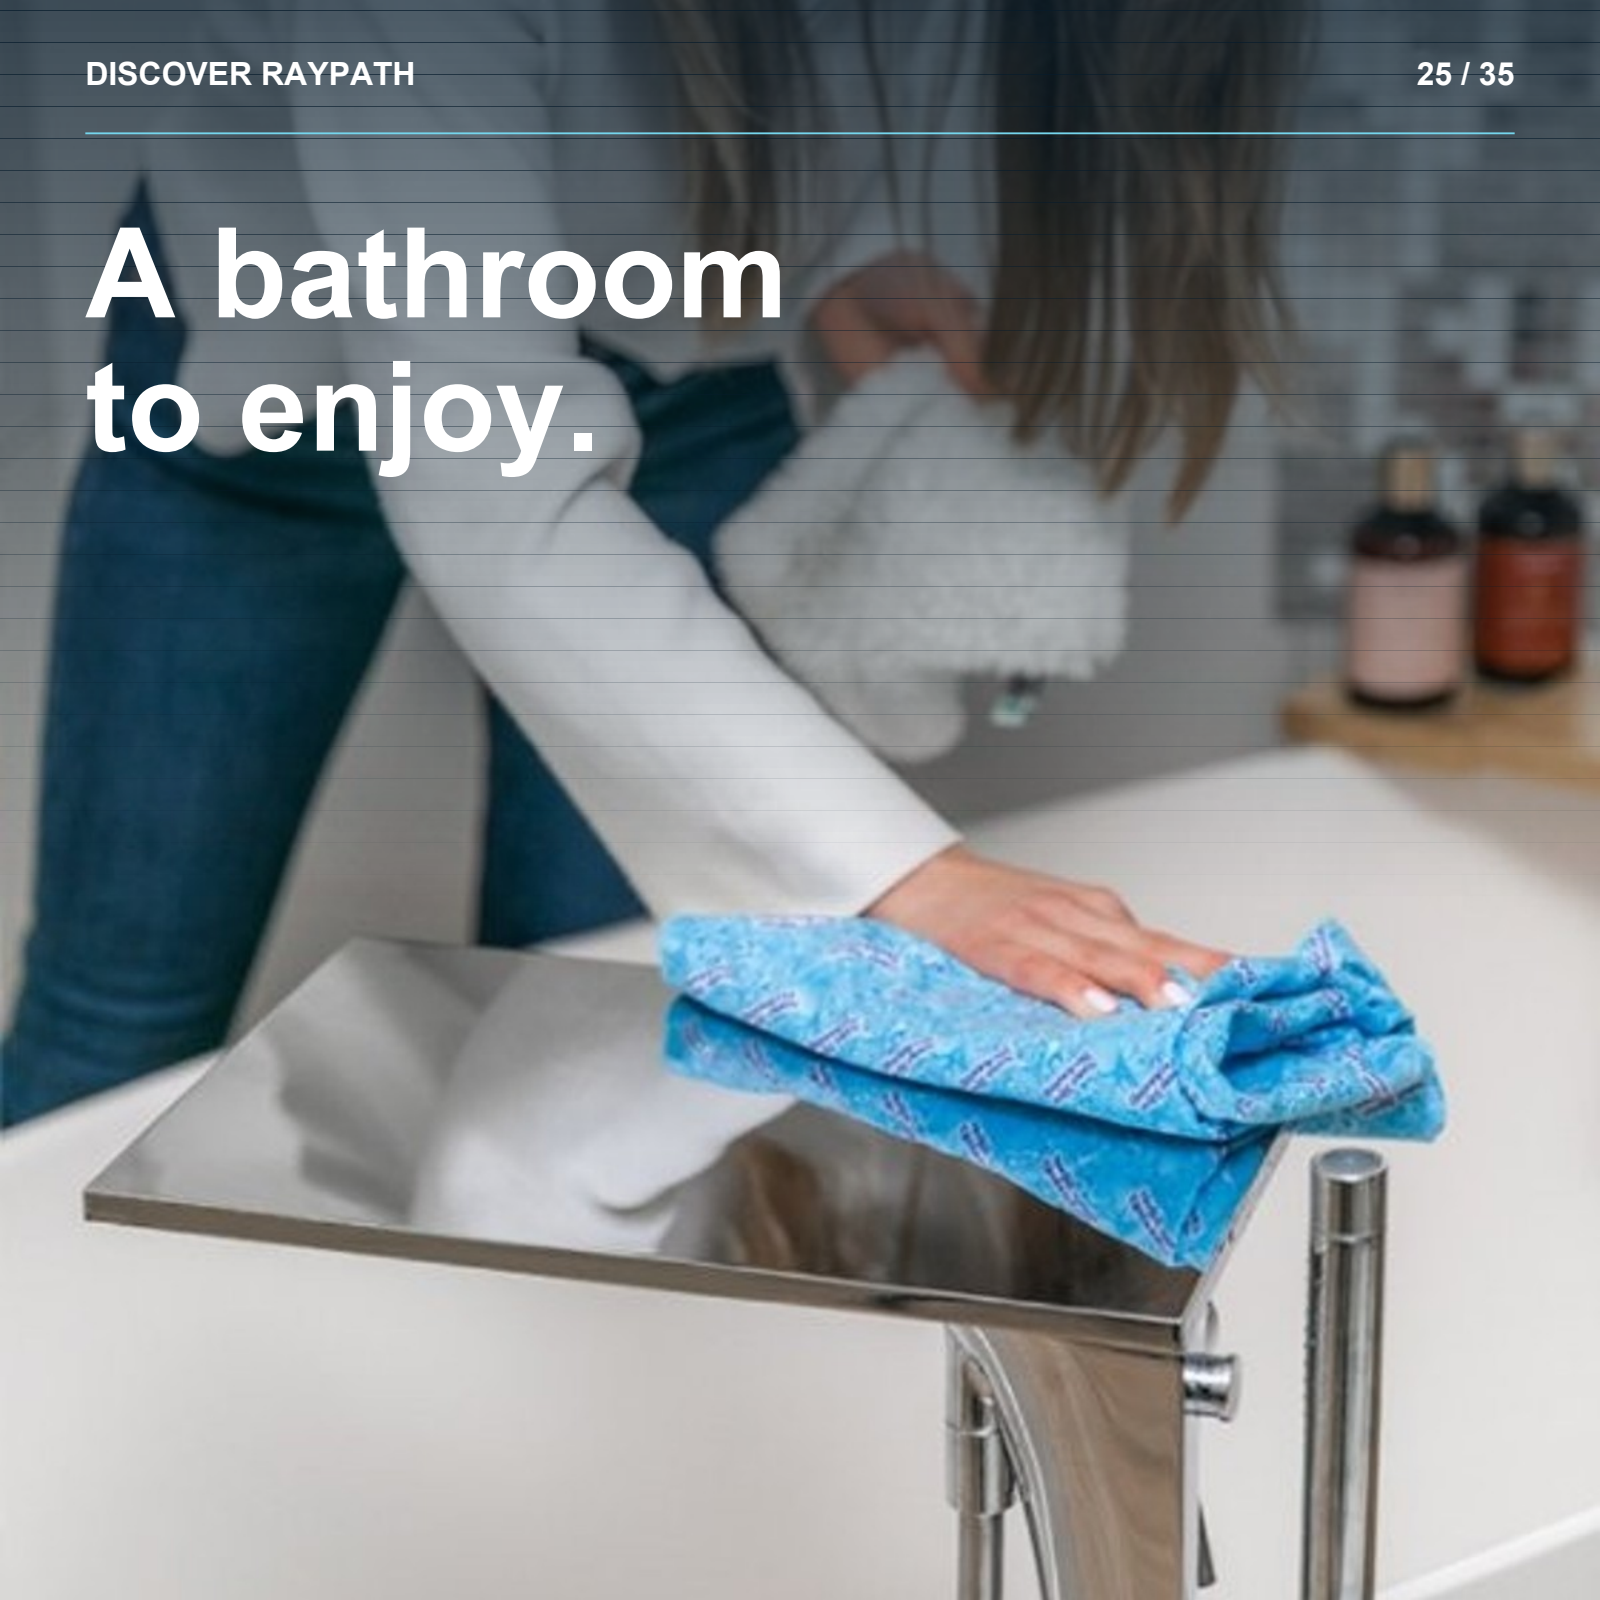

Floors without kneeling.

PAD / HOLDER / POLE

Choose compatible parts and a material suited to your floor.

A bathroom to enjoy.

CERAMICS / WATER / FINISHING

Clean suitable resistant surfaces. Limescale and specific stains need separate assessment.

Buy thoughtfully. Use again.

YOUR CHOICE / YOUR SPENDING

Choose products for your tasks. Care for them so you can use them for future cleaning.

Rinse as you work.

CLEAN MATERIAL / THE NEXT AREA

When cleaning wet, rinse out dirt. Change the water as needed.

Care is part of the method.

INSTRUCTIONS / SUITABLE WASHING

Choose temperature and detergent for your model. Remove dust from the pink glove as instructed.

Let the materials dry.

AIR / SPACE / THE NEXT USE

Dry as instructed. Store the materials once dry.

Technology with a clear role.

FIBRES CLEAN / SILVER IN THE MATERIAL

Nanosilver's properties and the cleaning method are different matters. Check the product documentation.

One task. A good start.

ONE PRODUCT / A SET LATER

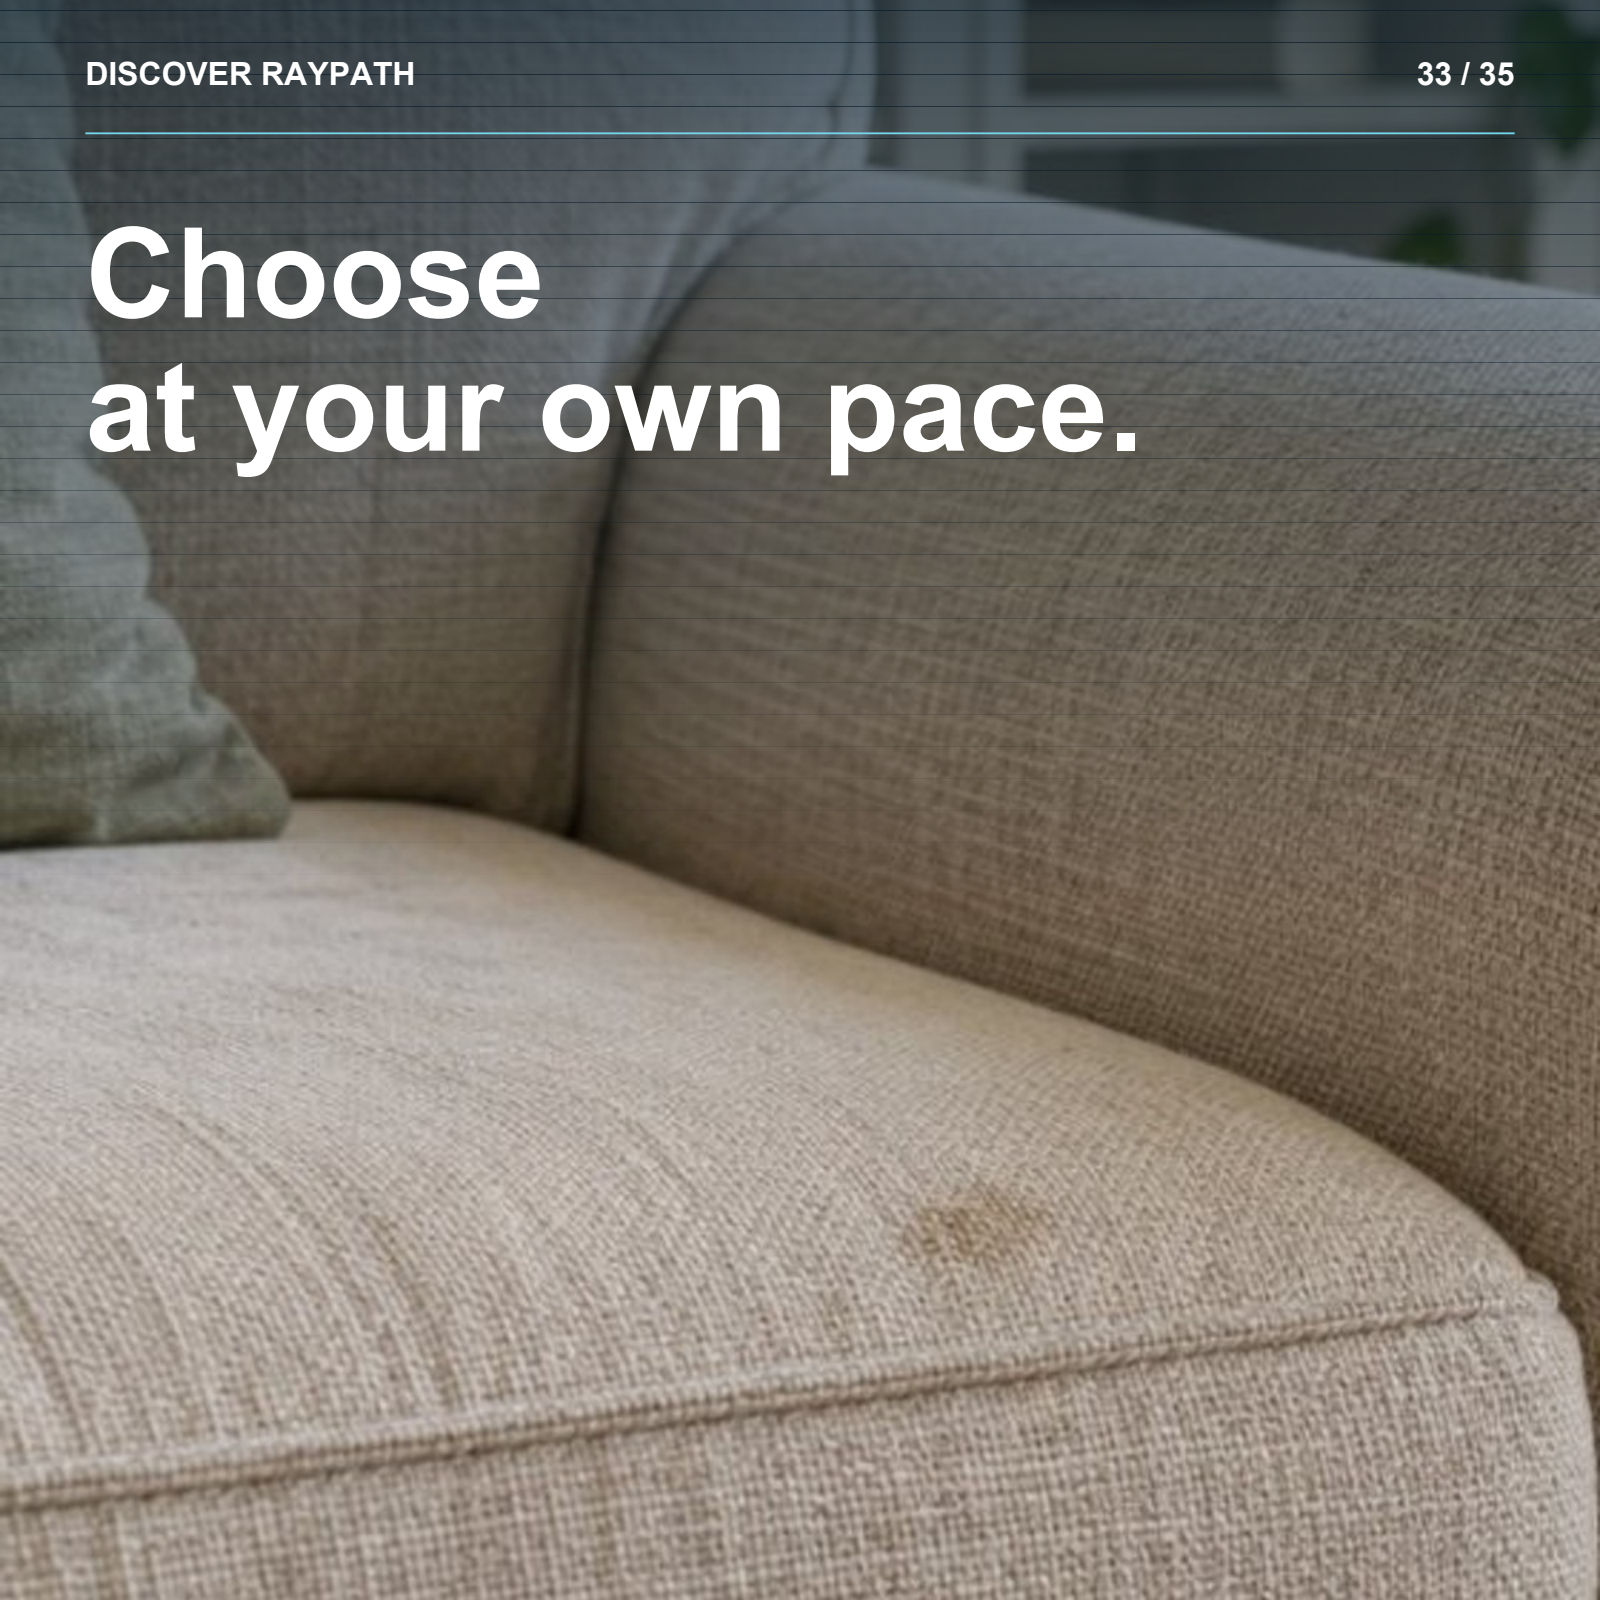

Start with what you need most often. Choose a set when you need more applications.

Your quick reference.

WHITE: WET / PINK: DRY

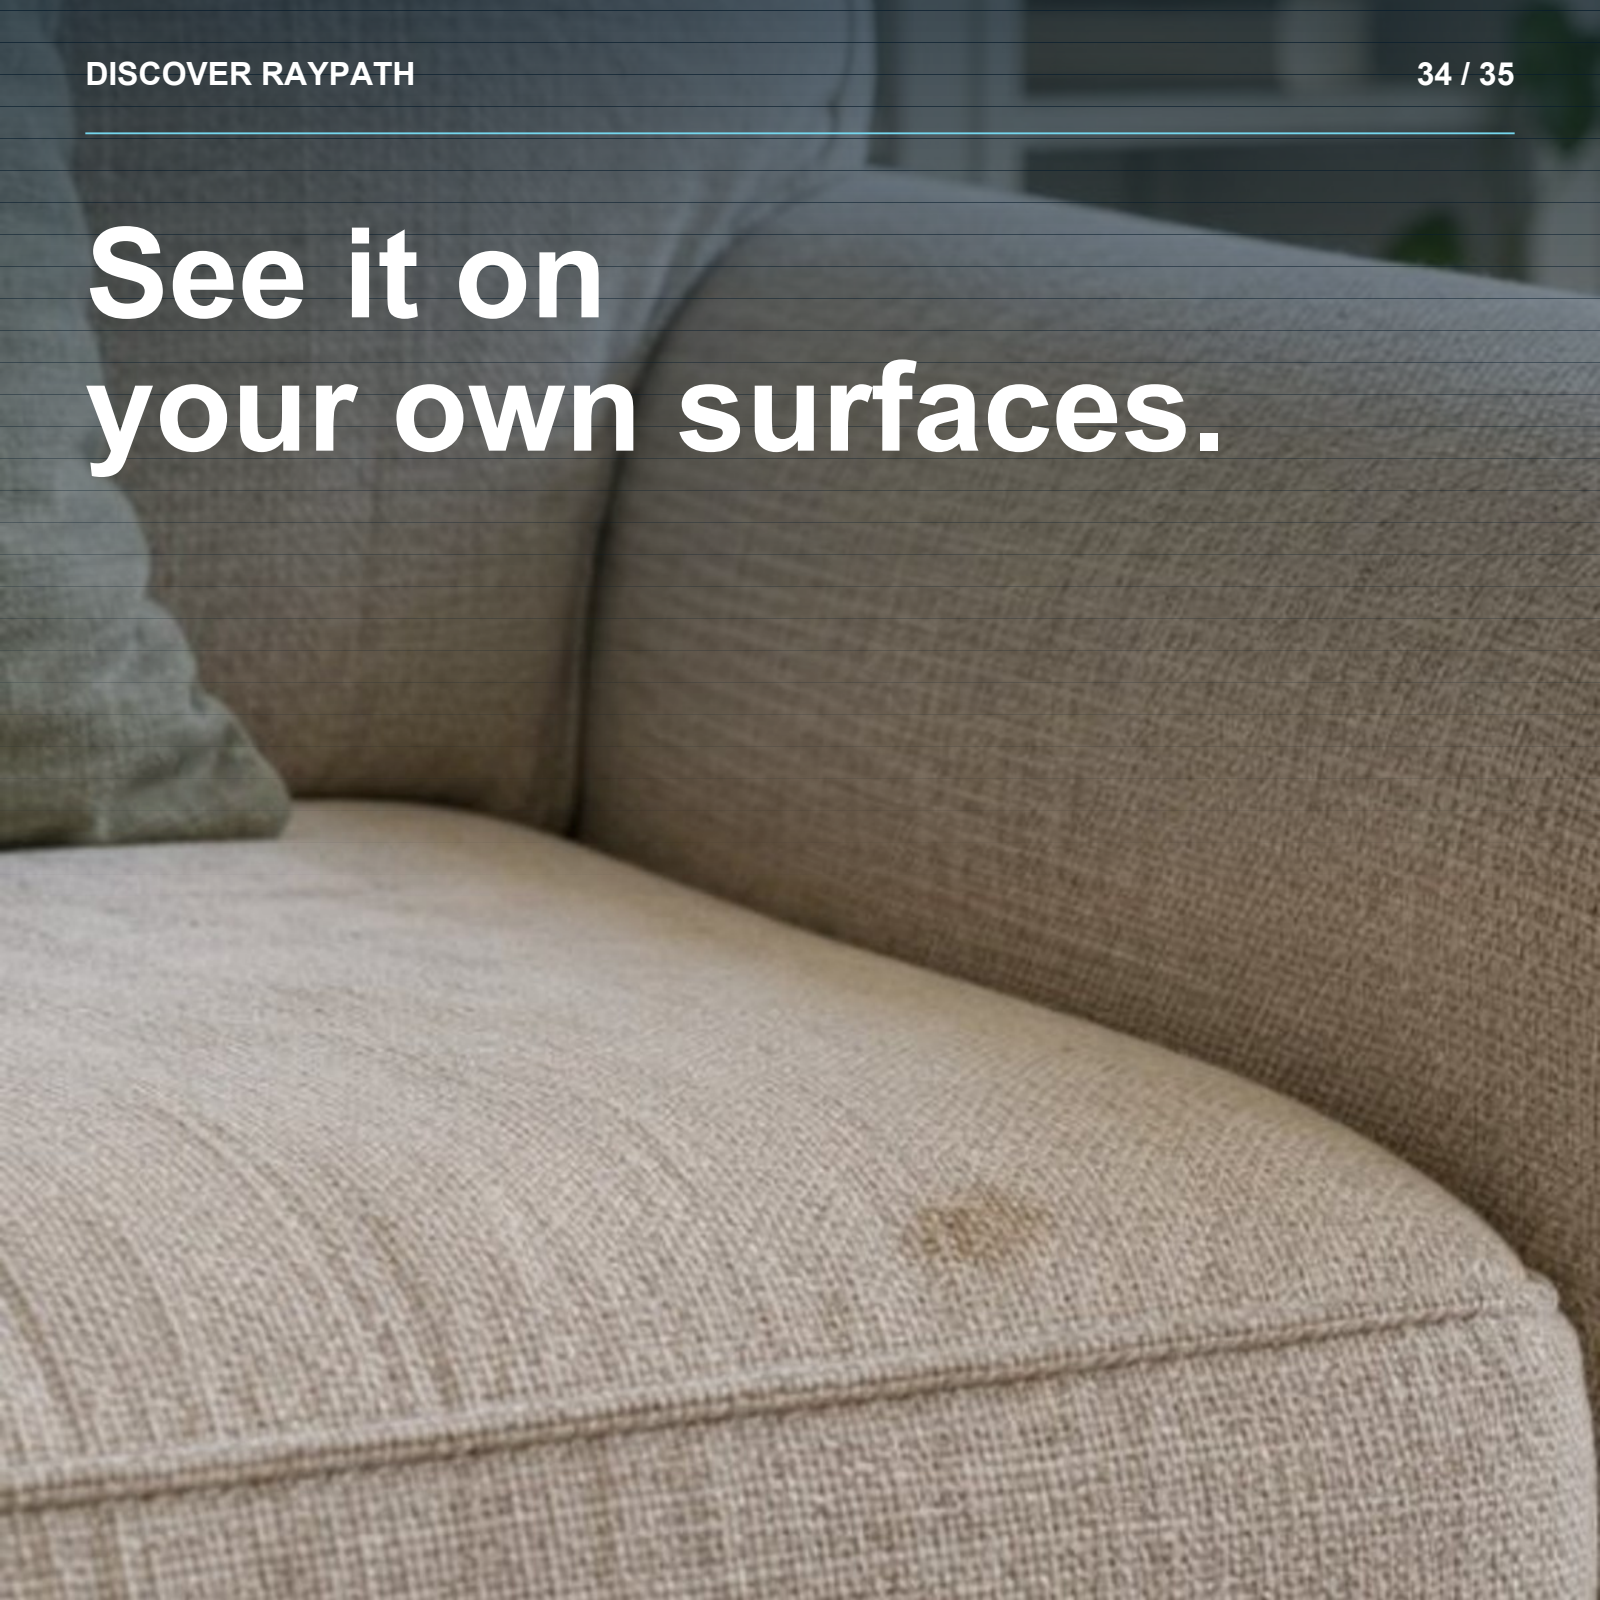

Sunbeam: finishing. NOVA: controlled moisture. Check your model's instructions for details.

Choose at your own pace.

ONE PRODUCT / YOUR DECISION

Shop online or see a demonstration first.
Choose the starting point that suits you.

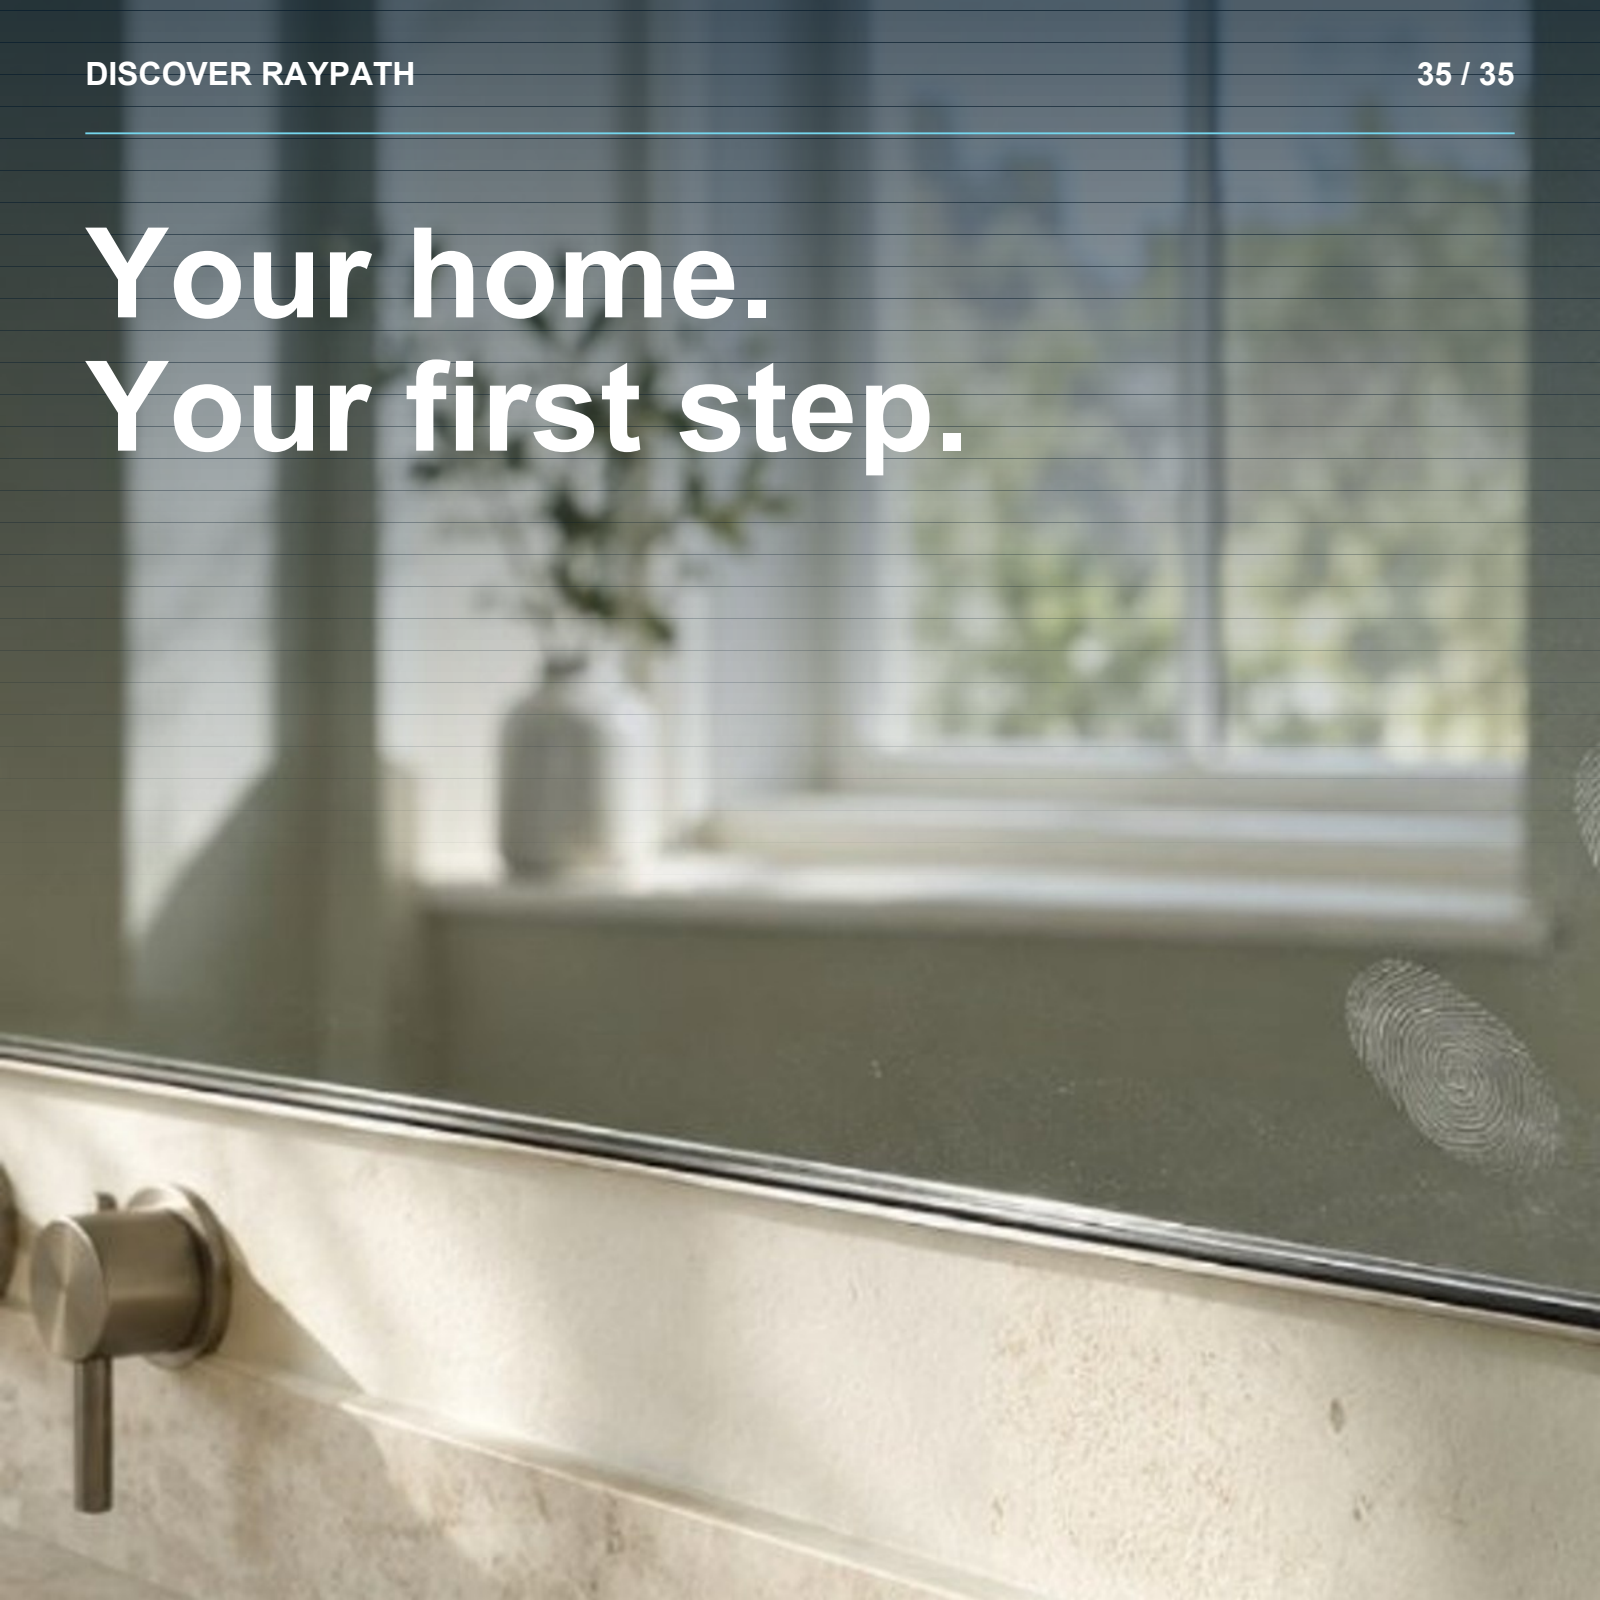

See it on your own surfaces.

DEMONSTRATION / QUESTIONS / CHOICE

Ask about a free demonstration. Timing, travel and scope are arranged individually.

Your home. Your first step.

DISCOVER / CHOOSE / TRY

Choose a product for your task. Explore the Raypath range.
